Developer **Full Stack** with a strong focus on **Frontend** with more than two years of experience in web design focused on **usability** and **accessibility** of the interfaces, complementing this last year with skills of **Node.js**, **Nest.js**, **Express.js**, **MongoDB** and **PostgreSQL** and **API Integration**. I specialize in creating attractive and functional interfaces focused on **user experience**, with great attention to **detail**.

PROFESSIONAL EXPERIENCE

Bigger

Software Developer

Remote. Australia

July 2023–March 2024

- I developed an automated marketing platform for advertising on social networks for brands and influencers, integrating various third-party APIs such as Google Sheets and social networks such as Facebook, TikTok, YouTube and X.
- Implemented component testing on the front-end and controller testing on the back-end.
- I designed and developed the technical documentation and user guide for the project.
- Developed a customer-facing platform for post-construction defect management, offering an all-in-one workflow system that automates and centralizes the scheduling and management of these issues.

Independent Project - MindTech

Full Stack MERN & Mobile App Developer

Buenos Aires, Argentina

May 2023 - June 2023

- Developed a technology ecommerce mobile application using MongoDB for database management, Web Services API for data communication and React Native for mobile application development. Node.js powered the backend, ensuring efficient operations on the server.
- I managed the project with Trello, designed with Figma and integrated payments using the MercadoPago API, resulting in a scalable, responsive and feature-rich application that offers optimized user experiences and secure e-commerce functionalities.

National University of José C. Paz

Technical assistant of the Virtual UNPAZ Management Department

Buenos Aires, Argentina

August 2019–March 2023

- Moodle database administration and virtual classroom design with HTML and CSS
- User management and virtual classrooms.
- Preparation of frequently asked questions and tutorials.
- Design of digital pieces: banners for covers and classroom headers, informative flyers for forums.

EDUCATION

MindHub LA

Full Stack MERN y Mobile Apps

Buenos Aires, Argentina

March 2023 - June 2023

The certificate in Full Stack MERN and Mobile Apps enables me to participate in the development of web and mobile applications using in-demand technologies such as HTML5, CSS3, JavaScript, MongoDB, Express, React and Node.js. My background allows me to create complete server configurations with Node.js and Express, manage databases with MongoDB, and implement interactive interfaces with React that connect efficiently to the Backend.

National University of José C. Paz

University Technician in Electronic Commerce

Use: 8.86

Buenos Aires, Argentina

August 2017-December 2020

The title of University Technician in Electronic Commerce enables me to participate in all activities related to online presence and sales within any type of organization. My training allows me to collaborate efficiently with development, design and production teams, as well as independently manage e-commerce projects. I have the ability to set up and manage online stores, and build products and services adapted to various sales channels.
